

## Practical exam

2)

code:

```
#include <stdio.h>
void max(int *p, int *q)
{
    int max;
    if (*p > *q)
        max = *p;
    else
        max = *q;
    printf("max:%d", max);
}
void main()
{
    int a, b;
    printf("\nENTER 2 NUMBERS : ");
    scanf("%d %d", &a, &b);
    max(&a, &b);
}
```

Output:

ENTER 2 NUMBERS : 12 54

max:54PS E:\app\Semester 1\AP\AP Practical\ap exam&gt;
